

Has your child ever told you how excited they are to go to the dentist?

That they can't wait to have their teeth counted and tickled?

What flavors will they pick to treat their tongue and bedazzle their smile?

What prizes will they choose and what will their goody bag hold?

As a parent you know it's about more than teeth, it's about the experience.

Your experience in a place that is fun and magical, educational and comfortable.

This is the world of pediatric dentistry,

this is the world of **dr. fern.**
